

FOR IMMEDIATE RELEASE

ALEXANDER NUBIA ANNOUNCES CLOSING OF FINAL TRANCHE OF ITS NON-BROKERED PRIVATE PLACEMENT

April 8, 2016 Alexander Nubia International Inc. (TSX-V:AAN) (the "Corporation" or "Alexander Nubia") is pleased to announce that it has closed the final tranche of its previously announced non-brokered private placement offering of up to 30,000,000 units (the "Units") at a price of \$0.05 per Unit (the "Offering"), for total gross proceeds of up to \$1,500,000. The Corporation issued an aggregate of 200,000 Units in the final tranche of the Offering for gross proceeds of \$10,000. Each Unit consists of one common share in the capital of the Corporation (a "Share") and one warrant (a "Warrant"). Each Warrant will entitle the holder to acquire one additional Share (a "Warrant Share") until April 8, 2018 at a price of \$0.05 per Warrant Share. If at any time prior to the expiry date of the Warrants the average closing trading price of the Shares on the TSX Venture Exchange for any 20 consecutive trading days is greater than \$0.25, then the Corporation may provide notice to the holders of the Warrants that the expiry date of the Warrants will be accelerated to the date which is 30 days after the date of such notice.

The net proceeds of the Offering will be used to fund further exploration activities at the Corporation's Abu Marawat and Fatiri Concessions, including drilling and sampling to extend and develop the Hamama project on the Abu Marawat Concession, and to drill a number of exploratory holes to investigate the potential of the former Abu Zawal mine in the Fatiri Concession. In addition, part of the funds will be used to fund the Corporation's general and administrative expenses, and for working capital purposes. The management of the Corporation has also made significant progress in reducing the Corporation's monthly overheads.

All securities issued pursuant to the Offering will be subject to a four-month hold period from the date of issuance under applicable Canadian securities laws. All Shares and Warrants issued in the final tranche of the Offering which closed today are subject to a four-month hold period which ends on August 9, 2016.

A total of 20,700,000 Units were purchased under the three tranches of the Offering for aggregate gross proceeds to the Corporation of \$1,035,000.

About Hamama Gold Deposit

Hamama is located within a northeast-trending gold-copper belt that extends for 40 km across the Company's Abu Marawat Concession. The Main Horizon of Hamama has a strike length of 3 km and is divided into three main zones; Hamama West, Hamama Central and Hamama East. Mineralization at Hamama crops out at surface, and at Hamama West is deeply weathered into a soft and friable oxidized blanket called the Gold-Oxide Cap, which extends over 900 m in strike length and has an average vertical depth of 35 m. Drill results in oxide at Hamama West include 37 m at 2.32 g/t Au and 107.1 g/t Ag in AHA-15, 32.6 m at 1.37 g/t Au and 56.4 g/t Ag in AHA-37 and 19 m at 2.46 g/t Au and 157.3 g/t Ag in AHA-46. Preliminary metallurgical (bottle-roll) test results on the Gold-Oxide Cap returned up to 92.2% Au and 65% Ag recovery by cyanide leach from oxide (see January 13, 2015 News Release).

Primary sulphide mineralization at Hamama West returned such intercepts as 48 m at 1.45 g/t Au and 31.8 g/t Ag in AHA-23 and 88 m at 1.11 g/t Au and 118 g/t Ag in AHA-31 (see May 12, 2015 News Release).

The last drill hole from the 2015 drilling program, AHA-58, was entirely mineralized, from surface to 210 m depth, and includes 39 m at 1.64% Zn, 0.25 g/t Au and 25.7 g/t Ag (53 m to 92 m), 12.3 m at 2.49% Zn, 0.29% Cu, 0.26 g/t Au and 41.4 g/t Ag (92 m to 104.3 m), 43.5 m at 3.70% Zn, 0.23% Cu, 2.61 g/t Au and 150 g/t Ag (112.5 m to 156 m) and 50.7 m at 0.69 g/t Au and 29.7 g/t Ag (160 m to 210.7 m).

About Alexander Nubia International Inc.:

Alexander Nubia (TSX-V: AAN) is in the business of exploring for and developing potentially economic gold deposits in the Central Eastern Desert of Egypt in the Arabian Nubian Shield ("ANS"). The Company's 100%-owned concessions, Abu Marawat and Fatiri, between them cover 2,772 km² of underexplored ground. Evidence of gold and copper mining in the concessions dates the many surface workings to pre-historic (Bronze Age) and Old Kingdom (Pharaonic), through Ptolemaic, Roman, Early Arab times and into the European Era of the early to mid 20th Century. Three historic gold mines occur within the two concessions: British miners produced gold at Sir Bakis, Semna and Abu Zawal into the 1950s.

Much of the gold-vein mineralization in the ANS is of the orogenic, quartz-carbonate-type and is associated with major north-northwest and northeast trending shear-zones. Centamin's Sukari gold mine is located 400 km to the south of Abu Marawat, in the same mountain belt.

The Abu Marawat and Fatiri Concessions are underlain by the Proterozoic-aged Pan-African greenstone belt of the ANS. The ANS also underlies the Red Sea and large parts of Saudi Arabia, The Sudan, Eritrea and Ethiopia. Significant VMS deposits in the ANS include Jabal Sayid in Saudi Arabia; Bisha Main and Harena in Eritrea; Hassai and Hadal Awatib in the Sudan and Emba Derho, Debarwa and Adi Nefas in Eritrea. The Company's Hamama gold-rich VMS shares key geological similarities with these major VMS deposits.

Similar geological settings to the ANS include the greenstone belts of the Yilgarn of Western Australia, the Birimian of West Africa and the Abitibi in Quebec, Canada. The ANS is most similar in age to the Birimian.

The Company's land package, located 350-400 km southeast of Cairo, includes excellent infrastructure; Hamama has direct access to two four-lane highways, a zero-gradient railway bed that runs through Abu Marawat concession to a Red Sea port, multiple high-voltage (capacity 220kV) power lines that cross between the two concessions, a water pipeline and nearby major cities: Qena, on the Nile River, 70 km to the west, and Port of Safaga, on the Red Sea, 50 km to the east. The city of Luxor, ancient Thebes, is a two-hour drive from Hamama and has an international airport.

Qualified Person:

Rick Cavaney is Alexander Nubia's Exploration Manager. He has over forty-five years of experience in the mining industry and was formally an exploration manager with Centamin at Sukari and Abu Marawat for eight years. As a fellow of the Australian Institute of Mining and Metallurgy (Aus.I.M.M) is a competent person under the Joint Ore Resources committee (JORC) Code and is a qualified person, as such term is defined in NI 43-101 of the Canadian Securities Administrators, and he has reviewed and approved this release. .
